

How much does it cost to get a CMS website?

Setting up a content management system can be very inexpensive... since some of the best software available to do it is free through open source software channels. What does cost money is leasing your domain name and hosting service, this can be as cheap as \$50 a year. Then it is just a matter of setting it all up.

If you want to learn how to setup your own Joomla! powered CMS, then we welcome you to join our Detroit area user group.

If you would rather we setup your website for you, then SuperHouse is ready to go to work.

Depending on what you want your CMS to do, we can get you started for as little as \$2500.

Content management systems are very powerful and can do a lot of different tasks... we would really need to talk with you in order to confidently quote our service on your project.
